Table of Contents

- Table of Contents
- Protocol Summary
- Disclaimer
- Risk Classification
- Audit Details
 - Scope
 - Roles
- Executive Summary
 - Issues found
- Findings
 - High
 - * [H-1] Storing the password on-chain makes it visible to anyone and no longer private
 - * [H-2] `PasswordStore::setPassword` has no access controls, meaning a non-owner could change the password
 - Informational
 - * [I-1] The `'PasswordStore::getPassword'` natspec indicates a parameter that doesn't exist, causing the natspec to be incorrect

Protocol Summary

The PasswordStore made to store and retrieve the user password. The goal of the contract designed to be used by a single user, it cant handle or its not designed to be used from a multiple users. Only the owner have the access to set and access the password.

Disclaimer

The Gabal team makes all effort to find as many vulnerabilities in the code in the given time period, but holds no responsibilities for the findings provided in this document. A security audit by the team is not an endorsement of the underlying business or product. The audit was time-boxed and the review of the code was solely on the security aspects of the Solidity implementation of the contracts.

Risk Classification

		Impact		
		High	Medium	Low
Likelihood	High	H	H/M	M
	Medium	H/M	M	M/L
	Low	M	M/L	L

We use the CodeHawks severity matrix to determine severity. See the documentation for more details.

Audit Details

Scope

```
1 ./src/└─
2 PasswordStore.sol
```

Roles

- Owner: The user who can set the password and read the password.
- Outsides: No one else should be able to set or read the password.

Executive Summary

I had almost 3 hours for auditing this contract and for finding our findings hope you fix it soooooon I will be watching:)

Issues found

Severity	Number of Issues
High	2
Medium	0
Low	0
Informational	1
Total	3

Findings

High

[H-1] Storing the password on-chain makes it visible to anyone and no longer private

[H-2] `PasswordStore::setPassword` has no access controls, meaning a non-owner could change the password ## Informational

[I-1] The 'PasswordStore::getPassword' natspec indicates a parameter that doesn't exist, causing the natspec to be incorrect
